Permissions

This page list all the permissions available in the **Project Permission Scheme** configuration section.

[Xray] Override Assign Test Runs

Allows users to set the Test Run assignee without the Edit Issues and Assign Issues permissions.

Xray Test Repository Permissions

A collection of Project level Permissions that allows to set the actions available to a given user on the Project Test Repository

[Xray Test Repository] Create folders

Allows users to create folders on the Test Repository.

- Whenever this permission is configured, only users with this permission will be able to create new folders in the Project Test Repository.
- If this permission is not set, the default Xray global permission for the Hierarchical Test Organization is applied.

[Xray Test Repository] Delete all folders

Allows users to delete any folder on the Test Repository.

- Whenever this permission is configured, only users with this permission will be able to delete any folder in the Project Test Repository.
- If this permission is not set, the default Xray global permission for the Hierarchical Test Organization is applied.

[Xray Test Repository] Delete own folders

Allows users to delete their own folders on the Test Repository.

- Whenever this permission is configured, users with this permission will be able to delete the folders in the Project Test Repository that have been created by them.
- If this permission is not set, the default Xray global permission for the Hierarchical Test Organization is applied.

[Xray Test Repository] Move/edit all folders

Allows users to move and edit any folder on the Test Repository.

- Whenever this permission is configured, only users with this permission will be able to Move any folders in the Project Test Repository and edit the name.
- If this permission is not set, the default Xray global permission for the Hierarchical Test Organization is applied.

[Xray Test Repository] Move/edit own folders

Allows users to move and edit their own folders on the Test Repository.

- Whenever this permission is configured, users with this permission will be able to move or edit the folders in the Project Test Repository that have been created by them.
- If this permission is not set, the default Xray global permission for the Hierarchical Test Organization is applied.

[Xray Test Repository] Move issues

Allows users to add, remove and move tests on the Test Repository.

- Whenever this permission is configured, only users with this permission will be able to add issues into folders (or move them) in the Project Test Repository or through the issue screen using the custom field.
- If this permission is not set, the default Xray global permission for the Hierarchical Test Organization is applied.
