# **Configuring Test Step Custom Fields**

Xray allows Project Managers to configure fields to be available in Manual Test Steps

- Configuration
- Native fields
- Actions available
- Custom fields
  - Create
    - Type of fields Available Actions available
- Limit of Fields
- Impact of configuration changes on Tests
- Impact of configuration changes on existing executions of Tests

# Configuration

## Native fields

Action, Data, and Expected Result fields are native fields, i.e, they are present by default. Data and Expected Result can be disabled.

#### Actions available

Native fields can be:

- enabled
- disabled
- set as required

Name	Description	Туре	Flags	Actions
Action	The action to be reproduced by the tester.	Text Field (multi-line)	NATIVE REQUIRED	
Data	Any data the related step requests (e.g. login credentials) to be used by the tester.	Text Field (multi-line)	NATIVE DISABLED	
Expected Result	The behaviour that the step should accomplish.	Text Field (multi-line)	NATIVE	
Deadline for Step execution	This step must be executed before the deadline	Date Picker	REQUIRED	
Is to execute against performance data set		Toggle		
Which environment		Radio Buttons	DISABLED	

# Custom fields

#### Create

A project manager can create custom fields to be available when designing Manual Tests

Test Step Custom Fields Define Test Step "Custom fields" at project level	Create Test Step	Field				Create
Name         Description           Action         The action to           Data         Any data the           Expected Result         The behaviou           Deadline for Step         This step must execution           Is to execute against performance data set         State Step	Options	Select List (single choice) This test step field is required	Add Create Cancel	Type Text Field (multi-line) Text Field (multi-line) Text Field (multi-line) Date Picker Toggle	Flags NATIVE REQUIRED NATIVE DISABLED NATIVE REQUIRED	Actions

# Type of fields Available

Available step fields:

Toggle

- Date Picker
- Date Picker
- Number field
- Radio button
- Select lists (single choice and multi choices)
- Text field (single and multi-line)
- User Picker

#### Actions available

Custom fields can be:

- enabled
- disabled
- set as required
- deleted

#### Test Step Custom Fields

Define Test Step "Custom fields" at project level

Name	Description	Туре	Flags		Actions
Action	The action to be reproduced by the tester.	Text Field (multi-line)	NATIVE	QUIRED	
Data	Any data the related step requests (e.g. login credentials) to be used by the tester.	Text Field (multi-line)	NATIVE	SABLED	
Expected Result	The behaviour that the step should accomplish.	Text Field (multi-line)	NATIVE		
Deadline for Step execution	This step must be executed before the deadline	Date Picker	REQUIRED		
Is to execute against performance data set		Toggle			
Which environment		Radio Buttons	DISABLED		
				Edit	
				Enable	
				Required	
				Delete	

Create

## Limit of Fields

Xray allows up to 6 fields enabled for a step. The Action field is always present and cannot be disabled. All others fields can be disabled and or delete.

## Impact of configuration changes on Tests

Configuration changes made on Test Steps Custom Fields or Native Fields (Data & Expected Result) will be reflected on Tests history, but <u>only for tests</u> that have values for that fields in their Test Steps. The following actions are the ones that are reflected in history:

- Delete/Remove field: all affected Tests' history will reflect the deletion of the field;
- Disable field: all affected Tests' history will reflect the disable of the field;
- Enable field: all affected Tests' history will reflect the return of this field.

1 Ⅲ	Action Step 1	Data Data 1	Expected Result Result 1	
	Toggle TSCF	Date TSCF 11/Sep/20	Date Time TSCF 14/Sep/20 2:00 pm	
↓	Attachments (0)			
↑ 2	Action Step 2	Data Data 2	Expected Result Result 2	
	Toggle TSCF	Date TSCF 30/Sep/20	Date Time TSCF None	
	Attachments (0)			

#### **Project settings**

Bruce Wayne made	e changes - Just now		
Manual Test Steps	Field Toggle TSCF disabled [ Value(s) concealed Step 1: true ]		
Bruce Wayne made	e changes - Just now		
Manual Test Steps	Field Date TSCF disabled [ Value(s) concealed Step 1: 11/Sep/20, Step 2: 30/Sep/20 ]		

Note: Toggle fields - Since the default value for them represents "FALSE", the actions performed in this field will only be reflected in Test History if the value is "TRUE". As you can you see in the example above.

## Impact of configuration changes on existing executions of Tests

Please be aware that a change on a custom field that is being used in a Test already being executed may request an action to reset or merge the test definition: Updating the definition of the Test after execution started
