

Attachments - REST

There are two endpoints regarding attachments in Xray.

Get attachment	/api/v1/attachments/{attachmentId}
Add attachment	/api/v1/attachments

Get attachment

 To download large attachment files, please use [version 2 of the REST API](#).

To get attachments, you can use the following endpoint:

Get an attachment

Request

PARAMETERS

parameter	type	description
attachmentId	String	- id of the attachment to get.

Example:

Example Request

```
curl -H "Content-Type: application/json" -X GET -H "Authorization: Bearer $token" https://xray.cloud.getxray.app/api/v1/attachments/7e0073ec-cc9a-44fa-a2da-9d8c163caeae
```

Responses

200 OK : **octet/stream** : Successful. The attachment is retrieved.

400 BAD_REQUEST : **application/json** : The attachment could not be retrieved.

Example Output

```
{
  "error": "No such file"
}
```

401 UNAUTHORIZED : **application/json**: The API token is invalid.

Add attachment

To add attachments, you can use the following endpoint:

Add attachment

Request

Example

Example Request

`curl -H "Content-Type: multipart/form-data" -X POST -F attachment=@report.pdf -H "Authorization: Bearer $token" https://xray.cloud.getxray.app/api/v1/attachments`

Responses

200 OK : **application/json** : Successful. The attachment was added.

Example Output

```
{
  "id": "7e0073ec-cc9a-44fa-a2da-9d8c163caeae",
  "filename": "report.pdf",
  "created": "2020-06-28T16:59:33.051Z",
  "size": 123446
}
```

400 BAD_REQUEST : **application/json** : The attachment information was not provided.

Example Output

```
{
  "error": "No file found."
}
```

401 UNAUTHORIZED : **application/json** : The Xray license is not valid.
